The popularity of AutoCAD has made it the second most popular CAD program. History AutoCAD was originally developed for the Apple II computer. In early 1981, Frank Rasmussen, who was an engineer at Apple's Human Interface Group (HIG), decided to write a drawing program for the Apple II. The name of the program was "AutoCAD" and Rasmussen wanted the name to describe what the program did in a simple and friendly way. In addition to the drawing program, Rasmussen wanted the program to include a drafting board, a cursor and a tool bar. Rasmussen chose the name "AutoCAD" as a combination of "automated" and "mechanical." Rasmussen put the word CAD in front of the name as a reference to the "Computer-Aided Drafting" movement of the late 1970s. The first version of AutoCAD was for the Apple II computer. The name, AutoCAD, meant "Automated Computer-Aided Drafting." Rasmussen began writing the program in 1980, and completed it in 1981. In 1982, Rasmussen presented a copy of AutoCAD to the Apple Computer Company, who published it as an official Apple program. AutoCAD was designed as a desktop application that could run on IBM PC and Apple II computers. The program was designed to run in both DOS (now Windows) and
