Prepare your students for a series of tests by creating them with ease and efficiency. The built-in exam creator can help you create tests and other documents that can be delivered to your students using the ProfExam Player. All-in-one Exam utility The ProfExam Suite 2022 Crack features the ProfExam Creator and ProfExam Player. These two utilities are easy to access and can perform tasks that include exam-creation, test delivery and question delivery. The ProfExam Creator helps you create an entire exam in a few simple steps. It allows you to create exams by simply clicking a button that appears on the interface. You can then customize the title, number, file version, date, passing score, time limit, and section. Adding questions is possible by clicking the "+ Question" button, and you can further customize the question by choosing the case study, answers, and section. The ProfExam Player helps students access the tests you have created. You can simply drag and drop exam files into it to deliver them to your students. Once the exam file is dropped, the exam is automatically launched. You can also edit the title, number, file version, date, passing score, time limit and section of the exam. You can even set the number of questions. Detailed Features Edit titles Titles for your tests are extremely important and you can add a title on the same way as you can add a question. Click the "+ Title" button, which will bring up a title box. You can then name your title by typing the desired text. Add questions Questions are the core parts of your tests, and they can be added easily by clicking the "+ Question" button. Once the question is added, you can change its category, options and other parameters by clicking the relevant buttons and typing the desired values. Select section You can select a question section by clicking the "+ Section" button. In the subsequent question list, you can add a question category by clicking the "+ Category" button. You can also select the preferred number of options and answers. You can also add a description for each option and answer. Create shortcut A shortcut can be created on the desktop of your computer by clicking the "+ Shortcut" button. You can then customize the title and create a shortcut that can be run on the computer.
