On the one hand, works of art are neither existentially nor . On the other hand, art cannot be totally considered as being practical in nature. *Ontwerp en analyse* (“Design and Analysis”, by Bernard Leupen, 1993) and his “*Geschiedenis en praktijk van het ontwerp*” (“History and Practice of Design”, by Bernard Leupen, 1994), where he focuses on the history and practice of design, and were the first attempt to bridge the gap between art and. Preface (the author) Bernard Leupen, in 1992, published a book called “*Ontwerp en analyse*” [Design and Analysis], one of the first books in the world dealing with the theory and practice of design. The book includes a design theory (based on the writings of Paul Otlet), a detailed analysis of six's, and a first chapter on the history of design from ancient times to the early 20th century. Contemporary artists use the techniques of design that used by the designers of the past, for the design of their works, but they often do so without following the theoretical background of the former. In his book “*Ontwerp en analyse*”, Leupen presents a thorough analysis of six of the first real designers. By analysing these architects, Leupen not only provides a new view of the design history but also helps artists and designers understand the essence of design. Bibliography Bernard Lassus, *Ontwerp en analyse*. (The Hague: NIOD, 1993), xiv, 397 p. Leupen, B. A. J., C. Grafe, (1991), *Ontwerp en analyse*. (The Hague: NIOD, 91) Translated by: Doris Koster. With a prefatory note by: C. Grafe.
