DIGITAL ROC Professional is a KODAK ColorPerfector. It can produce real contrast, true tone and balance color while correcting fading, poor color balance and degraded brightness. Its Curves Wizard provides real control over the image tonal quality and exposure. It offers two correction modes: Auto Correction and Curves. When Auto Correction is enabled, the Curves Wizard provides an extremely fast and accurate correction for contrast, hue, saturation, tint, brightness and gamma. This mode is particularly effective for single images. If you are shooting a series of images, simply turn off Auto Correction before starting. The Curves Wizard provides a simple 3-point correction for color tint, color tone, and overall image brightness. It also enables the user to apply the correct tonal curve or curves to individual colors, based on the color content of the image. DIGITAL ROC Professional Plug-In Description: DIGITAL ROC Professional is a plug-in for Adobe Photoshop that allows you to correct, balance and restore the color quality of digital images. DIGITAL ROC Professional analyzes color gradients in the image to remove color casts or tints and restore faded or lost color by generating optimal tonal curves for each color channel. In addition, the KODAK DIGITAL ROC Professional Plug-In provides advanced controls for precise adjustment of both, image brightness and image contrast, as well as the color tint controls plus it supports 16 bit images.
